I sent my QLs to Ralph when I sent the Prelim glycol data on WO 1110030. They are also in Element, but change a bit depending on the sample set. robin put the updated QLs in Element yesterday

We probably need to provide QLs at some point. There was a discussion on whether to use DW methods vs. SW-846. Because of the potential for higher concentrations Rich Rupert did agree with SW-846 but we might need to run DW if results are non-detect.

In the recent emails there were add'l SVOC compounds. Are these included in our list of analytes?

Cindy

Attached is a file that Stevie had and I amended for this sampling. Please take a look at it and see if I left anything out. Ex. 5 - Deliberative? Robin, please check the list of metals. We cannot do methane at this time, but Adam is working on adding this capability (column is on order).

Subject: Dimock Sampling

Kevin and Sue,

There is a possibility that HSCD will go out sampling next month on some home wells related to the Dimock HF issue. I briefly spoke to Rich Rupert last week and he had few details but progress is underway to outline a list of analytes and develop a sampling plan. I gave Rich both of your names as contacts for us. If there are any conference calls or more

information this week I'll let you know. For now I will send you two emails that were sent to me.

Sue - would you pull together a list of parameters based on the ORD HF Study and what we recommended in the past?

We can discuss more tomorrow at the branch meeting.

Cindy
